Experience

Lead Application Developer   Austin, TX
Texas State Library and Archives Commission   Jul 2023 - Dec 2025
- Served as sole staff developer for agency web infrastructure used by 275,000 monthly unique users.
- Migrated a 7,000+ node custom Drupal 7→10 application with zero downtime over a holiday cutover, completing 2 weeks ahead of EOL deadline and eliminating production security exposure.
- Directly migrated 3 of 7 Laravel applications (v6→12), oversaw contractor delivery of the remaining 4, and standardized plugin architecture across 7 WordPress properties — all across freshly provisioned RHEL Dev/Test/Prod servers and MySQL databases.
- Built a custom Drupal module enabling full-text search across 20,000+ unindexed server files (PDFs, Office docs, plaintext) using open-source Linux tooling, giving executive stakeholders an internal-only interface to audit and cull content in response to state-level compliance pressure.
- Inherited a 300+ ticket backlog and reduced it to ~10 consolidated project epics by completing outstanding work, closing stale or descoped items, and restructuring remaining work into trackable initiatives.

Website SME - Production Systems Support   Austin, TX
Storable   Jul 2022 - Jun 2023
- Served as technical escalation point for 30,000+ web clients, resolving DNS misconfigurations, managing SSL certificate lifecycle renewals at scale, and handling analytics integrations and CMS-level customizations.

Full-Stack Software Developer   NWT, Canada
Outcrop Communications   Mar 2019 - Feb 2021
- Built and migrated 5 Drupal applications (D6→D8) for government and Indigenous organizations across the Northwest Territories.
- Built a Node.js/Puppeteer automation tool that replaced manual review of ~3,000 content pages with a sub-5-minute audit, checking for broken links, missing videos, and absent related content.
- Managed updates and dev→prod deployments across ~150 Drupal sites, resolving CSS regressions and validating functionality at each stage.
- Engineered an offline-first PWA for Rio Tinto's Diavik Diamond Mine in-flight media platform.

Cofounder & Technical Lead   Đà Nẵng, Vietnam
Trellis   Aug 2016 - Mar 2018
- Cofounded and built a WordPress-based English tutoring certification platform, developing a custom theme, integrating Stripe payments, and managing hosting infrastructure.
- Executed a coordinated launch campaign across travel, volunteering, and certification networks — generating 600k+ impressions and selling out program capacity for 2 years within 3 months.

Technical Skills

Languages & Frameworks: PHP, JavaScript, MySQL, Twig, Node.js, Laravel, Drupal, WordPress
Infrastructure & Tools: (RHE)Linux, Apache, NGINX, Git, SSL/TLS, DNS
Practices: Legacy Modernization, CMS Migration, Dev/Test/Prod Environment Management, Production Debugging
